

Name: Enrolment no.:

Digital Image Processing

Assignment – 1

Date: 04/02/2026

1. Explain the fundamental steps in digital image processing with a neat block diagram.
2. Define distance measures in digital images. Explain:
 - a) Euclidean distance
 - b) City-block (D4) distance
 - c) Chessboard (D8) distance
 - d) m-distance
3. Explain histogram and histogram equalization. How does it improve image contrast?
4. Explain the Laplacian filter. Derive its discrete form for two-Dimensional Laplacian.
