

Electricity Bill App Documentation

1. Project Overview

This application consists of a Flutter-based web dashboard for users to view electricity bills and a Spring Boot admin panel for managing bill data.

2. User Guide

- Open the app at the provided URL.
- View electricity bill details including amount, units, month, and due date.

3. Admin Guide

- Log into the admin panel.
- Add or edit electricity bills with fields such as billing month, amount, units, due date, and notes.

4. Developer Guide

Frontend: Flutter Web

Backend: Spring Boot (Java)

APIs allow retrieving and adding bill data.

5. API Reference

`/bills/add` (POST)

`/bills/list` (GET)

6. Deployment Guide

Frontend deployed on Netlify.

Backend deployed on Render or any Java-supported hosting.

7. Troubleshooting

Check API connectivity, database configuration, and notification services.

8. Changelog

v1.0 – Initial release documentation.
